[57] ABSTRACT
2,2,2-trifluoroethoxy bis(2-fluoro-2,2-dinitroethoxy)me-
thane, $CF_3CH_2OCH[OCH_2CF(NO_2)_2]_2$, is an energetic
plasticizer useful in plastic-bonded explosives. Of par-
ticular importance is its miscibility with fluoropoly-
mers.

3 Claims, No Drawings

A statutory invention registration is not a patent. It has
the defensive attributes of a patent but does not have the
enforceable attributes of a patent. No article or advertise-
ment or the like may use the term patent, or any term
suggestive of a patent, when referring to a statutory in-
vention registration. For more specific information on the
rights associated with a statutory invention registration
see 35 U.S.C. 157.
